LANGUAGES

FRENCH	native
ENGLISH	B2
GERMAN	basic knowledge

SKILLS

- **programming**
- **Electronics**
- **CAD**
- **Computer vision**
- **AI**
- **Teamwork**
- **Project Management**

CERTIFICATIONS

- Driving licence (category B)
- SNEE

INTERESTS

- Fitness, skiing, tennis
- Chess ,board games, Formula 1
- Drawing

PROFILE

Autonomous robotics student at Polytech Nice Sophia, passionate about designing complete systems: mechanics (SolidWorks CAD), embedded electronics (PCB design with KiCad), computer vision and control. Autonomous and project-driven, I designed and developed a drone detection and tracking robotic turret from end to end. I am looking for a 4-month internship to contribute to hands-on robotics development.

PROJECTS

S.T.A.R. – Drone Detection and Tracking System

- Design of an autonomous turret meant to detect, track and raise an alert when drones are present.
- Development of a vision pipeline based on YOLOv5n, deployed on an NVIDIA Jetson Nano.
- Integration of cameras, thermal sensors and radars to prepare for multi-sensor fusion.
- Embedded development on ESP32: UDP communication, motor and servo control, real-time operation.

Line-Following Sumo Robot (final-year engineering sciences project, team)

- Programmed the robot's behavior on Arduino Uno: sensor reading, decision logic and motor control.
- Teamwork: task distribution, iterative testing and tuning of the robot.

WORK EXPERIENCE

June 2024 — **PRODUCTION OPERATOR**
PROFALUX -THYEZ

- Assembly of components according to quality procedures.
- Teamwork in rotating 3-shift schedule (3×8) to meet deadlines and targets.
- Quality control of in-process and finished products, setting aside defective items.

EDUCATION

2027 2025 — **ENGINEERING DEGREE IN AUTONOMOUS ROBOTICS**
Polytech Nice Sophia - Sophia Antipolis

2025 2023 — **INTEGRATED ENGINEERING PREPARATORY CYCLE (PEIP)**
Polytech Annecy-Chambery

2023 — **FRENCH GENERAL BACCALAUREATE WITH HONOURS**
Specialties: Mathematics, Engineering Sciences.
